App Name : Play Notes.

Target Audience : The ideal users of this app are mainly students .This App is mainly for people who wants to write notes and email it to others or save it in their dropbox etc.Save the notes in their directory.This App would help students to keep their notes safe.
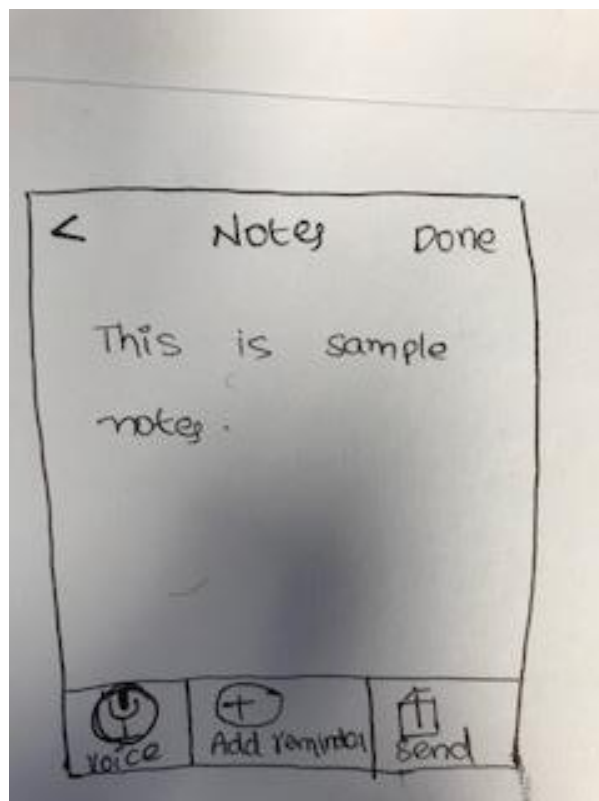

App Summary : My App 'play Notes' will help users to store their notes with some additional applications like print,email to others,store in the dropbox etc.It also has voice recognition system that helps to write the notes automatically.(For example when you are driving,you can use voice recognition and write notes)

Feature List: The following are the list of features in my App 'play notes'.

- Save your notes in your directory.
- Voice recognition to save my notes.
- Email your notes to others.
- Save it to your dropbox.
- Attach the notes to your calendar.
